AN ALGORITHMICALLY GENERATED GALLERY

A GROWING WORK OF ART

An algorithmically generated gallery exhibiting algorithmically generated art.

PROPORTION PIECE (formerly ALGO/ART) is an ongoing interactive artwork by Adam Clement. It begins with a browser-based generative drawing machine and extends into a growing, walkable 3D exhibition tower.

Each day a new collection of seeded drawings appears in the archive, and a new floor is added to the virtual gallery. Visitors enter the building, travel by lift and explore that day's work. Selected portrait studies are transformed into sculptural objects.

THE CENTRAL QUESTION

How far can the golden ratio govern a composition while its marks remain visibly human?

Interactive editor: southernadd-cmyk.github.io/algoart/

THE DRAWING MACHINE

COMPOSITION & MATERIAL

Eight composition systems explore golden-section relationships, rhythm, hierarchy, direction and deliberate empty space. Golden-ratio influences also guide parts of the tower’s room arrangement.

SYSTEMS

Orbital Studies / Golden Trajectories / Recursive Divisions

Radiant Systems / Connected Fields / Growth Systems

Constructed Forms / Automatic Marks

FIVE MATERIALS

Marker / Tissue & Graphite / Watercolour

Oil Paint / Action Painting

The drawings are created through deterministic JavaScript rather than a text-to-image AI system. Seeds and saved settings make studies reproducible. The editor offers adjustable controls and PNG / SVG export. The gallery presents daily selections as images and selected sculptures.

BIOGRAPHY & CONTACT

EDITORIAL RESOURCES

ADAM CLEMENT

Adam Clement is a UK-based computing educator and creative coder. His work explores the relationship between mathematical composition, expressive visual marks and browser-based interactive systems. PROPORTION PIECE turns that investigation into a growing virtual exhibition space as well as an interactive drawing machine.

SELECTED MEDIA

The companion ZIP includes original, dated artwork images from 28 October 2026, a tower image and captions. They are archival examples of an ongoing daily project, not fixed final editions.
